The tasks included submitting queries to an internal database containing names of individuals and entities that are present or recent former clients of PricewaterhouseCoopers to identify potential relationships, and determine the nature and type of relationship for disclosure to the Court. These conflict check and disclosure activities are in excess of the normal requirements associated with PricewaterhouseCoopers' normal retention as Sarbanes-Oxley, accounting, tax or other advisory services.

**B. Monthly and Interim Fee Applications – 30.6 hours - \$7,227.00**

18. During the Compensation Period, PricewaterhouseCoopers devoted time to educating the client-service team regarding the fee application process and examples of the respective fee applications and best practices for preparing time descriptions for the Bankruptcy Court. PricewaterhouseCoopers established a billing team devoting time to the review and preparation of the required billing submissions to the Bankruptcy Court, as well as the creation of an interim billing program (i.e. Time Tracker) for the professionals to submit their time by project and task code, as required by the Bankruptcy Court.

**C. Non-Working Travel Time – 476.8 hours - \$76,560.75**

PricewaterhouseCoopers reports each professional's non-working travel time billed to Delphi at 50% of the travel time; as such, PricewaterhouseCoopers is complying with the 50% reduction requirement.

**D. Validation and Remediation Services – 4,896.90 hours - \$830,410.00**

20. PricewaterhouseCoopers provided project assistance under the direction of Mr. David A. Bayles, related to Client's requirements under Section 404 of the Sarbanes Oxley Act of 2002 (SOX 404) and pertaining to Delphi's overall SOX 404 management certification testing and remediation plans. The majority of efforts fall into this category. During the interim period covered by this filing, most PricewaterhouseCoopers' activities were oriented around preparing for and beginning to execute the validation and remediation activities that will occur in subsequent interim periods. PricewaterhouseCoopers assisted Delphi by providing all of the services in the manner, at the locations and within the times as set forth in Delphi's RFQ: RED-001-06 of January 13, 2006 and as amended by an Addition dated January 23, 2006, Sections 2.2 and 3.1 through 3.15]. During the Compensation Period, PricewaterhouseCoopers prepared for and began to execute the following activities:

- (a) Performed validation testing at locations selected by Delphi management.
- (b) In order to facilitate external audit reliance as contemplated in our SOW, at each testing location specifically identified by management, PwC provided a binder or binders that contain the following:
  - (i) A summary report of the test results;
  - (ii) The testing templates and work papers;

- (iii) Copies of all samples and or items tested;
  - (iv) Any walkthrough diagrams and/or narratives;

- (d) Where requested, assisted testing location management with identification of possible remediation activities. In addition, as requested, PwC provided advice to management's regarding its implementation of the remediation activities.
- (e) Once testing location management believes that any issues have been remediated, performed additional testing to determine if controls had been effectively remediated.

**E. Process Walkthroughs – 3,703.50 hours - \$500,103.00**

21. During the 2005 validation testing, Delphi had a number of exceptions which were attributed to the use of "generic" key controls which didn't represent the actual key controls in place at individual manufacturing locations. In order to increase testing efficiency for operating management, the SOX team (including PricewaterhouseCoopers) and Delphi IAS in 2006, Delphi management requested that PricewaterhouseCoopers perform limited process walkthroughs through discussions with local management. The goal of the walkthroughs was to identify the specific key controls that are in place at each trial balance (the "TB") in scope, discuss them with local management to make sure that they agree that those are the appropriate controls and then to tailor the validation plans to test the specific controls that are in place. Note that the decision was made to perform walkthroughs at the trial balance level versus each location to be visited (47 TB's versus 111 locations) in order to minimize hours. During the Compensation Period, PricewaterhouseCoopers prepared for and began to execute the following activities:

- Performed limited process walkthroughs for each trial balance and document the results. The walkthroughs consisted of meetings with process owners to understand processes and suggest key financial reporting controls to local management for their approval. For each trial balance, PricewaterhouseCoopers provided completed walkthrough templates for each business cycle in the planned scope and a responsibility matrix. These documents will be used by local management to update the site-specific controls in the control frameworks in preparation for validation testing.

**F. IT Validation and Remediation Services – 3,754.40 hours - \$579,319.00**

22. PricewaterhouseCoopers provided IT validation and remediation assistance under the direction of Mr. David A. Bayles and Delphi IT management, related to Delphi's SOX compliance requirements. These activities were specifically related to providing management testing and guidance on application and infrastructure controls that support and complement the business process controls that are covered by the activities described in D. above. During the Compensation Period, most activities were oriented around preparing for and beginning to execute the validation and remediation activities that will occur in subsequent interim periods. During the Compensation Period, PricewaterhouseCoopers prepared for and began to execute the following activities:

- (a) Assistance with Information Technology General Computer Controls as follows:
  - (i) Review and input on the ITGC control framework
  - (ii) Review and input on testing scope and procedures
  - (ii) Management testing of ITGC controls
- (b) Assistance with segregation of duties as follows:
  - (i) Performed a review of Delphi's segregation of duties tool (SODA) and validated results
  - (ii) Ran reports with PwC's segregation of duties tool (ACE) for comparison with SODA

- i. Defined segregation of duties conflict rules to prepare for the annual segregation of duties review
- (c) Participated in process walkthroughs (E) to identify and validate SAP application controls.

**G. eTBR Services – 742.6 hours - \$79,778.00**

23. In response to internal control concerns raised by Deloitte & Touche, Delphi's previous external auditor, as part of the 2005 financial statement audit, Delphi management agreed to compare the general ledger balances for individual locations to the balances submitted through Hyperion to ensure that the balances are correct in Hyperion. Management requested that PricewaterhouseCoopers provide resources to assist with this project. The results of the project were used by management to support management's assertion that the balances are accurate. The total number of comparisons evaluated was approximately 280. The

PricewaterhouseCoopers team assisted the Delphi SOX core team in the following activities:

- (a) Prepare the templates that were sent to the local management teams to complete;
- (b) Identify differences between the local general ledgers and Hyperion balances and either followed up directly with local management or provided questions to the SOX core team for them to follow up with local management; and
- (c) For a sample of the comparisons, the PricewaterhouseCoopers team obtained a copy of the local general ledgers via facsimile and compared that information to the information included by local management in their comparisons.

**H. Contract Administration – 238.30 hours - \$41,963.00**

24. PricewaterhouseCoopers provided assistance with remediating the Contract Administration material weakness. PricewaterhouseCoopers provided specific technical skills to assist the Delphi material weakness remediation team with identifying and implementing key controls to correct the issues identified by Delphi during 2005. The PricewaterhouseCoopers contract management team conducted a survey across Delphi of contract management processes,

controls and systems in order to identify strengths and weaknesses. They suggested alternative approaches to improve the contract management process, including a specific focus toward identifying initial action steps to eliminate the reported contract administration control weakness.

PricewaterhouseCoopers respectfully submits that the interim compensation requested herein is reasonable compensation for the actual and necessary services rendered based upon the time, nature and value of such services. PricewaterhouseCoopers further asserts that the costs of services rendered and expenses incurred are comparable to the cost of similar services and expenses in matters other than under the Bankruptcy Code and consistent with PricewaterhouseCoopers' Retention Application.

WHEREFORE, for all of the foregoing reasons, PricewaterhouseCoopers respectfully requests that this Court enter an order: (a) awarding PricewaterhouseCoopers allowance of compensation in the amount of \$2,344,167.75 and reimbursement of out-of-pocket expenses in the amount of \$298,544.27 for the Compensation Period and directing payment of the foregoing sums to the extent not previously paid; (b) authorizing and directing the Debtors to pay the unpaid balance for said fees and expenses; and (c) granting PricewaterhouseCoopers such other and further relief as this Court deems just and proper.
